**Overall Inspection Comments**

They are turning the manure which seems to help. They are spraying 2 x a day adulticide. They are placing neporex on the manure daily. They have not been using lyme. Told him to hit it with the neporex and give it a day then hit the wet spots with lyme and remove the wet manure. The fly breeding is moderate. What he is doing is working. I will be back on wed for another inspection. Moderate adult fly population on the ranch. Lots of dead adults on the ground. One broken water cup. One of the workers fixed it in front of me. I am not citing today since the fly breeding population has dropped on his farm.
