ACTION: 03 - REINSPECTION REQUIRED				

**MOSQUITO AND VECTOR CONTROL - Poultry Ranch Permit ALL**

**No Violations Cited**

**Overall Inspection Comments**

Spoke to Jennifer and we are scheduling a supervisor hearing with the city of yuciapa, our management staff and the ranch. Ranch purchased the granule of the triazide just before we got there and started applying while we were here and the stuff works better than the spray. Can see an improvement. He is spot spraying in all houses now can see dead larva and larva that is dying. Drying pad looks alot better it is dry and there is no breeding. Went over how to replace the wet with dry. Told ranch hand to make a mound and not just a flat spot the hole should be filled and the same height as the rest of the manure. Ranch needs to continue with what they are doing. Ranch needs to continue with removing wet manure and replacing with dry. Ranch need to remove the manure from the concrete aprons in all houses daily. Ranch needs to stop the water line from jumping when the chickens move in the cage this is what is causing the wet manure on the aprons. Witness ranch putting down the pesticide. Ranch needs to continue working on the bait stations when they have time. The dead holes the ranch stated they are spraying daily told them they need to put a layer a dry dirt over it at night. Ranch hired new hands that will work the night shift. Ranch to continue adulticiding 2 x a day. Ranch to continue to turn drying pad 2 times a day and spraying it as well.
