| ACTION: 03 - REINSPECTION REQUIRED | | | | |

MOSQUITO AND VECTOR CONTROL - Poultry Ranch Permit ALL

No Violations Cited

Overall Inspection Comments

It rained the last 2 days. The drying pad is wet due to the rain. They have not turned it but he will spray it. Recc that if it continues to rain today to not turn the pad so we can keep the stuff underneath dry. Once the rain stops they need to continue with turning 2x a day. Some large wet spots from the rain the ranch hands where swiping and shoveling all the water out of the houses and away from the houses. Ranch hands where removing wet sports from the houses. Wet spots have decreases they do still have a few in each house. Artalano was applying triazcide on all the wet spots. Can see the triazcide is working lots of dead larva and lots of dying larva. All the larva I found were being affected by the pesticide. They started replacing the fly bait stations in the houses and they are working, full of dead adult flies. Ranch needs to continue removing the wet spots and spot treating the wet spots. Ranch needs to replace the wet spots with dry manure. Ranch needs to continue adultciding 2 times a day. Ranch needs to resume turning the drying pad 2 times a day once the rain stops and continue spraying the pad with pesticide. Ranch needs to continue with replacing broken cups. Could not find the pesticide log Artalano said it was on the table. I will check on thursday for the log.
